STEP THREE
Make sure steps 1 and 2 are completed

STEP FOUR
Tuition Breakdown

STEP FIVE
Enrollment Package
As you probably know, a career in nursing offers great opportunities and an excellent salary. The challenge is getting into nursing school.

Most nursing programs have a long waiting list, are very expensive, are extremely selective with whom they allow to enroll and, if you are accepted into the program, you cannot start right away.

SIGMA Institute of Health Careers is different.

We were established in 2001 to provide people interested in the nursing field the opportunity to enroll in a school that is affordable, where classes start monthly and we do not discriminate. We work with our students to make sure they succeed in the program and after they graduate. In addition, you learn from qualified instructors who come from many of the same communities as our students.

SIGMA is one of the most affordable nursing programs in South Florida. Our programs cost a fraction of what the larger schools charge. We keep our fees low so more people who desire to enter the field of nursing can do so. This helps our students and also has a positive impact on the community.

At SIGMA we provide you with the education, tools, knowledge and resources to succeed. Success is yours if you want to work for it. If you do, SIGMA is here for you.

The next step is yours.

SIGMA currently offers one diploma program (Practical Nursing) and an Associates degree program (Nursing AS).

NURSING PROGRAM

The Associate of Science Degree in Nursing Program prepares graduates to practice within the scope of the Registered Nurse. Students are trained to assess, plan and provide direct patient care and be a contributing member of health care teams. The Associate of Science Degree in Nursing Program is up to 2 years in length and completed over three 16-week semesters per year. Each course is offered at a minimum of twice per semester.

PRACTICAL NURSING

The Practical Nursing Program prepares graduates to practice within the scope of the Practical Nurse under the supervision of a Registered Nurse within structured, acute, intermediate, long term and ambulatory health care facilities. The student is taught to use the nursing process at the practical nurse level. The Practical Nursing Program is 12 months in length and completed over three 16-week semesters. Each course is offered at a minimum of twice per semester.
